

SpeedWrappers

Multi-format case overwrapper

Professionally wrapped finish for CD, DVD, BD & Nintendo cases

Overwrap up to 1200 cases per hour

25 case input hopper capacity

Table-top unit

Low cost investment

Fully transportable

The SpeedWrapper, is an automated, table top, wrapping machine designed for overwrapping CD jewel cases, DVD Amaray cases, Blu-Ray cases and Nintendo DS case, at high speed with little user intervention. When your output needs the professional edge or simply requires those receiving discs to know they have not been tampered with, wrapping is the ultimate solution. The Speedwrapper is an easy to use, cost effective wrapper which provides a neat even case wrap with perfect seams time after time.

The multi-format SpeedWrapper is available in CD or DVD case format. But, whichever version of the SpeedWrapper you choose, it can be easily and quickly converted to accommodate other formats such as Blu-ray and Nintendo DS, with the appropriate conversion kit. Converting between formats takes just 20 minutes.

The SpeedWrapper simply needs a power socket and roll of low-cost wrapping sheet to start wrapping cases. Users place up to 25 cases in the input hopper and press the start button. Once operating, the unit can wrap up to 1200 cases per hour. An optional Upstacker will collect the wrapped media cases and present them in a neat stack or row ready for the operator to lift them from the wrapper in one easy movement, saving the operator valuable time. With the use of the upstacker, a single operator can simultaneously feed the input hopper and remove the wrapped cases quickly and efficiently.

The SpeedWrapper gives a wrapping finish equal to that of CDs and DVDs found in any retail outlet. Whilst shrink wrapping leaves cases with rough, unsightly seams, the SpeedWrapper provides a neatly folded and sealed package.

SpeedWrappers
