egrips® Non-Slip Strips® powered by **egrips® technology**

The high performance material provides the most advanced anti-slip surface in the world!

Using The egrips® Non-Slip Strip®

1. Ensure that the surface of the phone is clean and free from dirt and oil.
2. Remove clear protective film from the egrips® strip.
3. Peel the egrips® strip from the card and apply to the device. The strip may be trimmed with a sharp pair of scissors. If the strip loses its grip, wipe with your finger or a damp cloth to return the original gripiness.

The egrips® strip must be in contact with a clean surface in order to grip... the more surface contact, the more it grips.

CAUTION: Never place phones or accessories over airbags in vehicles. This may cause serious injury in the event of an accident.

egrips® is a registered trademark of Flexible Innovations Ltd. • Made in USA • Patent Pending © 2006-2009 Flexible Innovations Ltd.
